

QDOS Kneeling Posture Chair

This kneeling chair is specifically designed to help ease your hips into a forward tilt position, encouraging an upright posture that correctly aligns your back, shoulders and neck. Kneeling chairs are a super sitting alternative for people with lower lumbar, sciatic and hip problems. They are also ideal for people with fistula problems, a painful problem exacerbated by traditional sitting positions.

The backrest can be adjusted up or down for a custom fit, and the chair height itself is adjustable using a gas lift mechanism. The knee pad includes a premium moulded foam for a luxury feel and extra support.

Features / Specifications:
